Go into any progressive county, and you will find that they have a stock law. It would be a shame on the county's good name, to abolish the stock law.

We heard a man say "to abolish the stock law, would be fine on the town people, because they could let their cows graze off the other fellows crops, if they didn't erect good fences." He's about right about it, they would.

Stock Law or no Stock Law is the burning question.

Plenty of exercise, fresh air, regular hours—is all the prescription you need to avoid influenza—unless through neglect or otherwise, a cold gets you. Then take—at once

Standard cold remedy for 20 years—in tablet form—safe, sure, no opiate—breaks up a cold in 24 hours—relieves grip in 3 days. Money back if fails. The genuine box has a Red top with Mr. Hill's picture. At All Drug Stores.

Yesterday we were asked if we ever saw a baldheaded woman. We answered "No," we never did, nor did we ever see a woman running around over town in her shirt sleeves with a cigar in her mouth; nor go fishing with a bottle in her pocket, sit on the damp ground all day and come home drunk at night. Nor have we ever seen a woman yank off her coat and say she could lick any man in town. They are not built that way.

Will the man who owns 300 acres of woodland, want his neighbors hogs to eat his mast? They will, if the Stock Law is abolished.

It has been rumored, for the last few days, that bootleggers are regular night callers in town, and are disposing of a lot of "Merry War Lye," whiskey, without being molested in the least. It seems that some officer is not doing his official duty, or this would be stopped.

The senate has passed the bill compelling all railroads to furnish passes to all state officials, lunatics and convicts. On Tuesday they defeated the bill; but Wednesday morning they called it up and passed it by a vote of 18 to 14. Senator Matthews tore his pants straddling. QUARLES & SADLER,

Why Swift & Company Handle Poultry, Eggs, Butter and Cheese

Swift & Company went into the produce business because they saw a crying need for the kind of service they were equipped to perform.

The produce business was in chaos. Collecting, transportation, preparation and distribution was hit or miss, with delay, deterioration and loss on every hand.

The farmer was at the mercy of an uncertain, localized market. He had no way of reaching through to the people who needed what he was raising for them. There was no premium upon improving his stocks, for grading was lax or lacking.

The consumer had to accept produce that, as a rule, had no known responsible name behind it. He had no way of knowing how long the eggs or the butter he was buying had been lying around in miscellaneous lots in the back room of a country store. Much of the poultry was not properly refrigerated before shipment or properly protected by refrigeration in transit.

Swift & Company's initiative brought system to this chaos. Their organization, equipment, and experience in handling perishable food products were already adjusted to the task. Their refrigerator cars, branch houses, central points, far-reaching connections, trained sales force, supplied just what was demanded.

Now the farmer has a daily cash market in touch with the nation's needs with better prices. Standardization makes better produce more profitable. More consumers are served with better, fresher, finer foodstuffs.

Nothing suffers from this save inefficiency, which has no claim upon public support.

Swift & Company, U.S.A.
